#### **DETAILED ACTION**

##### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 27 and 35-40 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 27 recites the limitation "in which Z, Y and n". There is insufficient antecedent basis for this limitation in the claim because the claimed formula (I) does not comprise the limitation "n". Correction and/or clarification are requested.

Claims 35, 37, 38 and 39 are indefinite because the claims recite the limitations "compound of formula (I)". It is unclear if these claims are dependent on claim 20 or not? If these claims are independent claims then each claim should recite a separate formula. Correction or clarification is requested.

Claims 36 and 40 are dependent claims. Therefore, these claims are rejected as well.

##### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 20-21, 25-27 and 30 are rejected under 35 U.S.C. 102(b) as being anticipated Leydet et al. Journal of Medicinal Chemistry, 1995).

Leydet et al. (J. Med. Chem.) teaches a compound having a formula identical to the claimed formula (I) as claimed in claims 20, 21, 25 and 26 (see STIC Search Report at page 27, the upper two formulae). Leydet et al. also teaches a process for synthesizing the compound as claimed in claims 27 and 30 (see page 2434, Scheme 2 in the J.Med.Chem.). Leydet et al. teaches all the limitations of the instant claims. Hence, Leydet et al. anticipates the claims.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 28 and 29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Leydet et al. (Journal of Medicinal Chemistry, 1995).

The disclosure of Leydet et al. (J. Med. Chem.) as described above, teaches the process for synthesizing the compounds of the claimed formula (I) (see page 2434, Scheme 2 in the J.Med.Chem.).

The instant claims differ from the reference by reciting the temperatures of the reaction.

However, it would have been obvious to one having ordinary skill in the art at the time the invention was made to apply such a process with the claimed temperatures to arrive at the claimed invention because the reference clearly teaches similar process that involves similar

reactant compounds of alcohol and acid anhydride, and, thus a person of the ordinary skill would expect such a process to have similar properties to those claimed, absent unexpected results.

***Allowable Subject Matter***

4        Claims 22-24 and 31-34 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The prior art of record do not teach or disclose the limitations of these claims.

***Conclusion***

5        The remaining references listed on from PTO-1449 have been reviewed by the examiner and are considered to be cumulative to or less material than the prior art references relied upon in the rejection above.
